

Senior Research Scientist
Sensus, LLC

Location: Hamilton, OH

Salary: Open

Type: Full time - Experienced

Employer: Sensus, LLC

Category: Research & Development

Post date: 07/11/10

Job Description

Lead research on tea and botanical biochemistry. Utilize engineering expertise to make process changes allowing manipulation and optimization of our extracted products. Conduct scientific assessments including designing experiments and analyzing data to provide direction to new product development division. Provide food science leadership in support of R&D group and cross-functional product teams. Collaborate with external consultants at universities and research organizations to design and lead products. Operate analytical instruments (LC/MS, GC/MS, and HPLC) for quantitative determination of antioxidant phytochemicals. Perform specialized HAT and ET antioxidant capacity assays for different antioxidant-containing products. Work within food product regulations (HACCP, FDA, cGCP, cGMP, and SOP).

Job Requirements:

1. Requires PhD in Food Science, Food Chemistry, or related field;
2. Requires minimum of 24 months experience in food research including tea processing;
3. Experience must include use of analytical instrumentation (LC/MS, GC/MS, and HPLC), running HAT and ET antioxidant capacity assays, and working within food product regulations (HACCP, FDA, cGCP, cGMP, and SOP).

Sensus, LLC is an equal opportunity employer.
